

MAKINEX MIXING STATION – MS 100

Fast Mix & Pour For Self-levelling Cements, Compounds & Epoxies

The MAKINEX Mixing Station MS-100 is the ultimate mixing solution for self-levelling cements, compounds and epoxies, producing a perfect mix every time. Designed by Contractors for Contractors, this portable station provides efficient hands-free mixing and enables fast precision pouring of materials.

Get your job done in half the time! One Makinex Mixing Station with stirrer can mix up to 100kg [220lbs] in 3 minutes. For large jobs additional stations are recommended.

The MAKINEX Mixing Station can be used for all self-levelling cements, compounds and epoxies. It is made from high quality, lightweight and durable materials. The MS-100 is suitable for large scale projects and with its compact size can also be used for small rooms and spaces.

With the ability to remove the stirrer from the station you can mix multiple batches by having two mixing stations and use the same stirrer. Additional buckets can be purchased and used to supply a water source on job sites for cement preparation and cleaning purposes. The empty station can also be used to transport product and tools on and off job sites.

The Makinex Mixing Station provides excellent value and pays for itself quickly, saving time on jobs and labour costs.
